BRAITHWAITE'S RETROSPECT

OF

PRACTICAL MEDICINE AND SURGERY.

Parts 1 to 8 Inclusive.

Uniform American Edition.

1840 to 1844.

NEW-YORK:

DANIEL ADEE, 107 FULTON-STREET.

Boston:—JORDAN, SWIFT, & WILEY 121 WASHINGTON-STREET.

Philadelphia:—ZEIBER & CO. 3 Ledger Buildings, 3d & Chesnut-st.

1844.

This work contains 1 sheet. Postage 1½ cents under 100 miles...over, 2½ cents.

TO PHYSICIANS, STUDENTS, &c.

In sending the General Index of Braithwaite's Retrospect of Medicine and Surgery to you, a word of explanation is not inappropriate. The Retrospect of Medicine and Surgery was commenced in London in 1840, by W. Braithwaite, and the republication in this country by the subscriber in 1842. The design of the work is to collect and present to the Practitioner once in every six months a succinct and reliable digest of such improvements and discoveries as have been made in Medical Science, in any part of the world, within that time, and that too, as nearly as possible in the language of those who made such discoveries or improvements, so that by a reference to this work any physician may have at his command at a trifling cost, a full and complete summary of all that is new and valuable in the medical world, without subjecting himself either to the expense or labour of searching through the various journals and new medical works that are daily issued.

That this object has been successfully accomplished we are happy to refer the physician and student to the testimony of every professor of any eminence who has examined the work. They unite with us in pronouncing it the most truly useful Journal ever given to the medical world.

The Retrospect is published semi-annually, and each number is complete in itself, containing about two hundred octavo pages, together with an index and table of contents. It is printed on fine paper, with clear type, and furnished to subscribers at \$1 per annum, invariably in advance. It has now reached its ninth No., and the whole series to the close of the present year (ten Nos.), will be furnished for \$5. But few complete sets are now on hand. Postmasters are authorised by law to remit subscriptions free of postage.

A wish has been repeatedly expressed by many of our subscribers that a General Index should be prepared, by which they might see at a glance, without going through the indexes of the different numbers, where to find an account of any improvement or discovery which may have been made within the last four years in any particular department. In compliance with that wish this index has been prepared, and a similar one will be issued every fourth year. Your attention is respectfully asked to the testimonials which will be found on the last page of the index and third page of the cover.

Respectfully, DANIEL ADEE, 107 Fulton-st., N. Y.

AGENTS FOR THE SALE OF THE RETROSPECT.

TESTIMONIALS.

From CHANDLER R. GILMAN, M. D., Professor College of Physicians and Surgeons, New-York.

Mr. Daniel Adee:—

New-York, Dec. 14, 1844.

I have been a constant reader of the RETROSPECT from its first publication, and esteem it very highly. As a digest of the periodical literature of the day it is of the greatest value to medical men whose occupations do not permit them to devote much time to reading. No other work with which I am familiar will enable the practitioner to keep himself so well informed as to the progress of medical science. I commend it very earnestly to the patronage of the profession.

C. R. GILMAN, M. D.

From H. D. BULKLEY, M. D., late Physician to the N. Y. Dispensary.

Mr. Daniel Adee:—

New-York, Dec. 14, 1844.

I have been gratified with the very favourable manner with which your republication of Braithwaite's Retrospect of Practical Medicine and Surgery has been received by the profession in this country. For bringing this truly valuable work within the reach of so many who could not otherwise have availed themselves of it, and that, too, at a price so moderate, you well deserve our thanks—and you have my best wishes for continued success in your enterprise.

Yours, &c., H. D. BULKLEY, M. D.

From ROBERT WATTS, Jr., M. D., Professor of Anatomy and Physiology in the College of Physicians and Surgeons of the University of the State of New-York.

Dear Sir:—

New-York, Dec. 13th, 1844.

Although it is rather late in the day for me to offer an opinion with regard to BRAITHWAITE'S RETROSPECT, yet as you think it may be of use, I am most happy to serve you. I consider your Republication the most valuable medical periodical published in this country, containing as it does the cream of the foreign and American journals. I think it especially valuable to those of our profession who reside in the country, and who have it not in their power to take a number of journals, and to whom under our present post-office system, the expense of receiving journals by mail is often greater than the cost of the work itself.

I remain, &c.,

R. WATTS, Jr.

Mr. Daniel Adee:—

Boston, Dec. 5, 1844.

We have examined with considerable attention the work of Mr. Braithwaite, and think it affords an excellent view of the existing state of Medicine and Surgery. To those of the profession who have not free access to the foreign medical journals it must be invaluable.

JOHN C. WARREN,
J. MASON WARREN,
W. CHANNING.

From JACOB BIGELOW, M. D., Professor of Materia Medica, and Theory and Practice of Medicine, Massachusetts Medical College.

Mr. D. Adee:—

Boston, Dec. 5, 1844.

I consider Braithwaite's Retrospect a useful exhibition in a compendious form of the improvements and other novelties which annually appear in medicine and its subsidiary branches.

JACOB BIGELOW.

REPUBLICATION OF
THE LONDON LANCET,
Without Abridgement.

The subscribers have undertaken the republication of this most learned, eminent, and popular of all medical periodicals, from a conviction, founded on experience, that no work is more needed, or called for in the United States, and that it will meet with a circulation commensurate with its merits, which will leave it second to that of no reprint now issued on this side of the Atlantic.

An abridged reprint of the London Lancet has already been issued, and commanded an extensive patronage; but its incompleteness was a serious drawback on its value, and was loudly complained of, for it was well known that the original rarely contains a useless line, and hence that no portion of it could be omitted without disadvantage to the reader. Indeed abridgements of any kind are objectionable; but in a work like the London Lancet, where every contributor is an oracle of medical science, where every word is weighed, and where apparently trifling details are often of the utmost importance, it is an evil carefully to be avoided. Hence the republication now announced will be line for line and letter for letter with the original, a fact which cannot fail to secure it the warm support of the whole medical faculty, who have long regretted their inability to obtain it unless at a price which almost amounted to a prohibition.

In England no regular physician is without this work, and no physician will be without it here who wishes to consult the current opinions and experience of the ablest medical professors in the world, and to make themselves acquainted with the progress of medical science. It recommends itself to the general reader by the ever-varying interest of its extraordinary medical cases, and its simple and amply tested instructions in the management of every disease to which human nature is liable, must make it a work of the utmost value and importance to the heads of families. But it is a waste of words to eulogize the London Lancet. The best thing the subscribers can say of their enterprise is, that they reprint the work ENTIRE, so that every word of the original will be found in the republication.

TO THE MEDICAL FACULTY.

THE MOST POPULAR MEDICAL JOURNAL IN THE WORLD

REPUBLICATION OF

THE LONDON LANCET, NEW SERIES.

A JOURNAL OF BRITISH AND FOREIGN MEDICAL AND CHEMICAL SCIENCE, CRITICISM, LITERATURE, AND NEWS.

Editor—MR. WAKELY, Surgeon, M. P.

Sub-Editor—HENRY BENNET, M. D.

In announcing the renewal of the republication of the London Lancet, it is proper to state that the cause of its suspension in this country was the enlargement of the original edition to such an extent as to render it impossible to republish the work entire at the price at which the American edition had been fixed.

The undersigned have now made arrangements for the prompt and regular issue of a handsome and complete edition, with all the engravings and wood cuts included, of the London Lancet in monthly parts. This work has long been celebrated as the most valuable periodical for medical practitioners ever published. It is edited with great ability and industry, and contains reports of all the Medical Lectures of consequence, of all new cases and information in the practice of Medicine and Surgery, and in short of every event that has a bearing upon the interests of the medical profession.

In its present enlarged form the Lancet will contain addresses, new to the American reader, introductory to a course of lectures on Chemistry, by PROFESSOR LIEBIG, which embrace a most ample and beautiful exposition of the principles of the science, both of Inorganic and Organic Chemistry.

Also, a course of Lectures on *THE OPERATIONS OF SURGERY, and on Diseases and Accidents requiring Operations*, by ROBERT LISTON, Esq., containing numerous *Illustrations*. There are eleven of these Lectures published, none of which have been republished in this country.

A department is now allotted to Chemistry, Pharmacy, and *Materia Medica*. Every new remedy, every new process made known throughout Europe and America for preparing Chemicals and Vegetable Remedies, will be found in this part of the Lancet in an intelligible form; also all the news relating to the state and progress of Chemistry, Pharmacy, and the Drug Trade; also the Transactions of the Chemical and Pharmaceutical Societies.

The attention of Apothecaries and Chemists is respectfully called to this department of the improved edition.

The American edition will be a perfect fac simile of the English one, in the same form, size, and number of pages, printed on the best paper, with large and readable type.

The high cost of the English edition has prevented its general circulation in the United States, but by the arrangement of republishing it in New-York, and the low price of subscription, it comes within the reach of all.

It should be stated, also, that the character of the Lancet is adapted to the knowledge of a general reader, and that it would be a valuable periodical in the hands of every intelligent man, even though he be little acquainted with the professional terms in which medical matters are commonly wrapped up.

Persons subscribing for the Lancet should state particularly whether they wish their subscription to commence with the volume—and should also write plainly the *TOWN, COUNTY, and STATE* where the work is to be sent.

PRICE, FIVE DOLLARS PER ANNUM, payable always in advance. No subscription will be received without prepayment, and none will be continued after the time paid for shall have expired, unless the same be renewed by a new payment.

The first number of the new series will be issued on the 1st day of January, 1845.

BURGESS, STRINGER & Co.,
222 Broadway, cor. Ann-st., New-York.

CAUTION.—B. S. & Co. have no TRAVELLING AGENTS throughout the country to solicit subscriptions to the “Lancet.” Persons wishing to subscribe to the work will please address as above. Letters containing money for subscriptions to Periodicals or Papers can be franked by the Postmaster and sent free.

TESTIMONIALS.

From WILLARD PARKER, M.D., Professor of Surgery, in the College of Physicians and Surgeons, City of New-York.

754 Broadway.

Mr. Braithwaite's "Retrospect of Medicine and Surgery" is a work of the highest merit, and enjoys a most liberal patronage in Europe, and I am confident the American Edition of the same work will be most cordially received by the Medical Profession of our own country. No one will fail to possess it who loves his profession and desires to be up with the improvements of the day. For the trifling sum of \$1.00 per annum, he can have all the advancements making in the Medical and Surgical world spread before him every six months. The American Publishers must be eminently successful in this enterprise.

W. PARKER.

From VALENTINE MOTT, M.D., Professor of the Principles, Practice, and Operations of Surgery, with Surgical and Pathological Anatomy, Med. Department of N. Y. University.

Braithwaite's "Retrospect of Practical Medicine and Surgery," appears to me, to be an excellent *résumé* of the most important and useful papers, and matters of fact, in the different branches of the medical profession. The remarks of the editor are sound and judicious. As it sums up briefly and semi-annually, it is peculiarly well fitted for the Profession of our country.

VALENTINE MOTT.

From GRANVILLE SHARPE PATTISON, M.D., Professor of General, Descriptive, and Surgical Anatomy, New-York University.

Messrs. Ade & Estabrook

654 Broadway, Oct. 31st, 1842.

I feel obliged to you for the copy of "Braithwaite's Retrospect," &c. which you have sent me, and rejoice to see a re-print of it in this country. Having received the English Edition, and being familiar with the work, I hesitate not to say that I know of no publication more valuable. Embodied in it, you have all that is new and valuable, most judiciously culled from the medical periodical press, not only of Great Britain, but of the world.

I remain, yours respectfully,

GRANVILLE S. PATTISON.

From JOHN B. BECK, M.D., Professor of Materia Medica and Medical Jurisprudence, College of Physicians and Surgeons of N. Y.

To Messrs. Ade & Estabrook, Publishers:

Oct. 26, '42.

GENTLEMEN:—I am happy to find that the "Retrospect of Practical Medicine and Surgery," by Mr. Braithwaite, has attracted your attention. It is a work of no ordinary value, and calculated to be exceedingly useful. As such I hope most sincerely that your republication of it in this country will be extensively patronised.

JOHN B. BECK.

From J. KEARNEY RODGERS, M.D., Surgeon to the N. Y. Hospital.

110 Bleecker-st. November 1st, 1842.

Messrs. Ade & Estabrook are re-publishing Braithwaite's "Retrospect of Practical Medicine and Surgery." I consider it a very excellent work, and one that cannot fail to benefit the reading part of the Profession.

J. KEARNEY RODGERS.

DANIEL ADEE, 107 FULTON-ST, NEW-YORK,

Will Publish on the 1st of January,

No. 1 OF THE

TREASURY OF HISTORY,

COMPRISING A GENERAL INTRODUCTORY OUTLINE OF
UNIVERSAL HISTORY, ANCIENT AND MODERN, AND
A SERIES OF SEPARATE HISTORIES OF EVERY
PRINCIPAL NATION THAT EXISTS, THEIR
RISE, PROGRESS, AND PRESENT
CONDITION, &c., &c.

BY SAMUEL MAUNDER,

Author of the "Treasury of Knowledge," "Biographical Treasury," "Literary and Scientific Treasury," &c.,

TO WHICH IS ADDED THE

HISTORY OF THE UNITED STATES,

BY JOHN INMAN, Esq.

The above valuable work will be issued in about twelve Nos. octavo, printed on fine paper, with clear type, and will be sold at 25 cents per No.

"An Encyclopaedia of History in Miniature,—some hundreds of volumes compressed into one. The author first gives a general sketch of ancient and modern history—a sort of explanatory chart by which we perceive the relations of one state and empire to another, and mark how their boundaries advance or recede, fluctuate, or become defined, and then furnishes a neat and concise digest of the history of each kingdom or dominion of the world. The book is a universal storehouse of historical facts, classified, chronologically arranged, linked by succinct narration, and brought down to the present time. To the historical student, and to all general readers, the work is invaluable for constant reference, if only for its copious and minutely accurate dates; and it must form an indispensable complement to all libraries."—*Britannia*.

For Sale by Book and Periodical Dealers generally throughout the Country.
